

**Roca**

# TOTAL PREMIUM

We congratulate you and thank you for purchasing this Roca product, which has been designed, manufactured and checked by our technical staff.

Likewise, if you purchased the panel, it will include specific instructions for installing it.

## **EFFECTS OF MASSAGE**

The action of the air bubbles on the body has been proven to be highly beneficial for the health. The following effects are particularly worth mentioning:

- Stimulates and improves skin hygiene and cardiovascular circulation.
- Generally improves capillary and lymph circulation.
- Tones the muscles and oxygenates the skin.
- Particularly indicated in cases of muscle pain, lumbago, arthritis, post-operative convalescence, stress and fatigue in general.

## **PRECAUTIONS**

- This device is not intended to be used by people (including children) whose physical, sensory or mental capabilities are reduced, or no experience or knowledge, unless they have supervision or instructions concerning the use of the apparatus by a person responsible for security.
- Cleaning and maintenance of this device must not be done by children without supervision.
- Children should be supervised to ensure they do not play with the device.
- In spite of the preventive and relaxing therapeutic effects of hydro-massage, it is important to note that in the case of acute conditions, uncompensated heart disease, serious hypertension or certain infectious diseases, and in the case of certain groups (children, the elderly, and pregnant women), certain special conditions regarding bath duration, temperature and frequency must be borne in mind. In these situations it is advisable to consult your doctor first.
- It is recommended not to take a bath directly after drinking alcohol or having a meal.
- Use only water from your home network properly treated and disinfected.
- If the water hardness of the installation is very high, it is advisable to install a water softener to guarantee that the whirlpool equipment is working properly.
- Do not use foam-bath products with the whirlpool since the amount of foam produced could lead to overflows.

## **INSTALLATION AND MAINTENANCE**

- To guarantee the safety of use of this product, it should only be installed and repaired by qualified installers, who can demonstrate to the appropriate authorities awareness and competence in the application of National Regulatory requirements for safety, i.e. electrical and water supply/disposal.

## Description

## ■ Whirlpool bathtub

### ■ Remote control

The unit has a remote control with color touch screen that can be used inside and outside the bathtub to control the hydromassage functions.

The screen changes to power saving mode after 10 seconds without pulsation. To activate it again, you should press 1 time in any part of the screen.

 It is required to place the batteries to use the remote control (see pg. 15)

**It is necessary to synchronize the remote control with the bathtub before first use. (see pg. 13)**

## Main screens

The diagram shows the 'Main menu' interface. At the top, it displays '26°C' and '15\''. Below this are four blue buttons: 'WATER' (callout 3), 'WATER + AIR' (callout 4), 'AIR' (callout 5), and 'AIR PULSE' (callout 6). At the bottom are two larger buttons: a yellow 'Sitz 2/15 CHROMO' button (callout 7) and a green button with a white arrow (callout 8). To the right of the interface is a numbered list: 1 Water temperature, 2 Remaining time, 3 Water massage, 4 Soft massage (water+air) with a plus icon, 5 Air massage with a plus icon, 6 Pulsating air massage with a plus icon, 7 Chromotherapy with a plus icon, and 8 Next menu.

The diagram shows a control panel with a digital display at the top showing '26°C' and '15'. Below the display are eight numbered callouts pointing to specific functions:

- 1: Temperature maintenance ON indicator (points to the '26°C' display)
- 2: Programa ON indicator (points to the '15' display)
- 3: Temperature maintenance (points to the red 'HEATER' button)
- 4: Timer (points to the blue 'TIMER' button)
- 5: Programs (points to the purple 'PROGRAMS' button)
- 6: Ozone disinfection (points to the orange 'O<sub>3</sub>' button)
- 7: Tools (points to the yellow 'TOOLS' button)
- 8: Previous menu (points to the green button with a left arrow)

 = level adjustment  
 = submenu

## Adjustment screen

1 Function selected

2 Level indicator

3 Decrease

4 Increase

5 Previous Menu

## Direct activation of functions

Function is enabled in the default level.

## Power selection screen / options

Level selection to increase or decrease the intensity / options value. If the value set is "0", the function stops.

## Lack of water

When the water level in the bathtub is not enough, it does not start to work or functions in progress are stopped. Also, the remote control warns about lack of water along with an acoustic signal.

## Water Temperature alarm

If the water temperature is 50°C or more, an acoustic signal is activated and the functions in progress are interrupted.

# Hydromassage functions

**Water massage**

The water massage is made by water jets that produce a stimulating effect on our body. In Total Premium bathtubs, water massage consists of a dorsal and plantar massage with jets especially suitable for sensitive areas of the body.

**Soft Massage (water+air)**

Total massage session: massage that combines the effect of air and water, an integrated experience for an embracing effect perfect to relax your body and your mind. It is a very soft effect and more relaxing than the air massage. This massage is produced through Soft jets that create a Champagne effect.

**Air massage**

The air massage, is a massage in the form of bubbles that are ejected through small jets at the bottom of the bathtub, obtaining a relaxing massage by the embracing effect of bubbles.

**Pulsating air massage**

The pulsating air massage increases and decreases its intensity periodically.

## Water massage

It is not possible to adjust the level of this function.

# Chromotherapy

In Total Premium, you will find the Chromo-therapy function. This function is performed through 3 LED lights that change their color to create an embracing effect that perfectly fits in with the hydromas-sage session.

| Colours meaning and use |        |                                                                                            |
|-------------------------|--------|--------------------------------------------------------------------------------------------|
| 1                       | White  | Represents purity and the light of day. Feeling of warmth and transparency.                |
| 2                       | Red    | Primary colour warm, stimulating in distress and physical states of weakness in the body.  |
| 3                       | Blue   | Primary colour cold temperament. It has sedative and tranquilizing effect.                 |
| 4                       | Yellow | Synonym of light. It brings optimism, vitality, joy and enthusiasm for life.               |
| 5                       | Green  | It has effects on the mental balance, reassuring. Not for nothing is the colour of nature. |
| Cycle 'Soft'            |        | Cycle energizing, warm colours and stimulating.                                            |
| Cycle 'Live'            |        | Sequence of soft colours with a relaxing effect.                                           |

## ■ Selection of predefined colors and cycles

## Temperature maintenance

Constant water temperature during the massage.

## Timer

Change the duration of the massage between 1 and 30 minutes. The default is 20 minutes.

## Programs

The system allows the customization of the massage session, being able to create programs according to the needs and desires of each user by a simple and fast way, or select preset programs.

## Ozone disinfection

Ozone in small amounts produces a sanitizing effect throughout the whole hydromassage system, maintaining a clean system every time you use it.

## Tools

Options and configuration settings.

## Temperature maintenance

ON/OFF (single level).  
Compatible only with whirlpool Water and Water+Air.  
Maintain the temperature of the water that exists at the moment of the activation.

⚠ The function will not start if the ater massage or soft massage is not activated.

# Disposal of electric and electronic products

NOTE: This symbol and recycling system is only applicable in the European Union. It does NOT apply to the rest of the world.

At ROCA we are committed to protecting the environment. Please help us by discarding this product at the end of its life-cycle in a responsible manner, to prevent that certain substances contained in electrical or electronic equipment may cause harm to human health and the environment.

The crossed-out wheeled bin symbol, shown above and on the product, means that it should not be discarded with other household waste. At the end of the product's life-cycle, it must be delivered to the corresponding collection facilities enabled by the authorities in your country or to the supplier from which you purchase a product of equivalent type or that fulfills the same functions as the previous equipment. This last option may not be available in some countries, so please check with the authorities in your country about the collection systems available and the collection facility closest to your home.

This way, you can cooperate with the protection of the environment through the reuse and recycling of waste electrical and electronic equipment. On the contrary, administrative responsibilities can be derived for you in case of non-compliance with the rules for the delivery of the waste of this product.

Batteries shall be previously removed and discarded separately in suitable recycling containers.
